This report shows two basic types of state support that districts have been receiving from the state. Column 1 shows the % of debt service costs (project costs) funded by the state before the enactment of S200 [7-18-00]. Column 2 shows the % of new debt service costs ("eligible costs") funded by the state after S200 became law, and col. 3 shows difference between the col. 1 and col. 2. Column 4 shows the state % of regular education costs (CCSA over T&E budget) for those districts qualified by the CEIFA wealth to receive CCSA aid. Current districts are deemed too wealthy to qualify for this basic type of aid.(Excluded from report: VoTechs, Jointure & Ed. Serv. Commission and non-operating districts.)

Under S 200: (1) districts are entitled to 40% of their eligible costs if their 'actual' CCSA state share, when multiplied by 115%, is less than 40%; (2) remaining districts receive 115% of their latest-calculated '99-'00 state share, except (3) Abbott districts, which are entitled to receive 100% of their eligible costs. Districts entitled to receive aid equal to 55% or greater of their eligible costs are required to be supervised by the EDA. Further, if such districts have an "A" or "B" designation (per District Factor Group/DFG designation) and have difficulty raising taxes to support the school construction needs of their district, they may apply for Abbott funding @ 100%.

**Asterisk indicates districts that are not entitled to receive basic aid for regular education (CCSA) and therefore did not receive debt service aid under CEIFA..*
